VENT AIR®- windproof, waterproof and breathable. VENT AIR® keeps the body dry and cool while it protects against the force of the weather. The material consists of a three-component high-tech fabric, a high performance material with an inner coating and a water repellent outer treatment. The body's excess heat will be transported away through the fabric, without letting in wind or water. All garments made from VENT AIR® have taped seams. VENT AIR® has a minimum hydrostatic head of 3000 mm. The standard for waterproof materials is 2000 mm and its breathability is superior to most other breathable materials.

Two sweatshirt materials, bound together, creates a doubleface material. This gives the garment a "heavier" feeling, nicer finish and a perfect fit, wash after wash. You will feel the difference!

DUNDEE 2136008

Jogging pants in "double face" sweatshirt material. Two front pockets and one back pocket with zipper. Piping at side seams and boot cut at bottom leg. Elasticated waist with a drawstring.

- 80% cotton, 20% polyester • 325 g/m² • 900 black, 600 navy, 130 dark ash • S-XXL
